## Kubus 200

The pad luminaire Kubus is designed to illuminate exterior pathways.

The pure and geometric shape of the Kubus allows the use in virtually every environment. Whether it is set into an historical ambience or modern architecture the luminaire fits perfectly. The restrained, factual design language allows the high-quality materials to stand out combined with impressive reflections in the glasses. The cube-shaped luminaire family is available in two dimensions: edge length of 200 and 450 millimetres. The small version is equipped with an E27 socket to be operated with efficient compact fluorescent or LED lamps.

Available as special version in bollard shape or as custom-made luminaire.
